# Table Top Farms

## Grow Mushrooms Indoors!

### All About Table Top Farms

A Field & Forest Products exclusive! These pre-inoculated and incubated hardwood sawdust blocks arrive ready to fruit. Ideally suited for the windowsill or shady kitchen gardens of cooks who demand specialty (and freshly picked) mushrooms. These Farms are available for Shiitake, Oyster, Lion's Mane, and Reishi. Also, watch for exclusive offers on special seasonal varieties. Instructions vary depending on species, but bags are opened or punctured, placed in adequate growing conditions, and misted as needed. These kits will require light either natural or artificial. Fresh mushrooms will grow in a matter of weeks. Each kit produces mushrooms on a short term basis. We guarantee the first fruiting. Table Top Farms make an excellent choice for class projects or gifts!

### 8-Block Sets

If your interest is in controlled “grow-room” style cultivation on sterilized or pasteurized substrates for maximum yields, consider beginning with our economical 8-Block Sets to test your mushroom growing skills. Blocks arrive ready to produce mushrooms and come with instructions to guide you in the fascinating challenge of ramping up mushroom production. They are packaged in quantities of 8 for the best pricing on shipping and handling. All are certified organic, and grown on wood from Wisconsin hardwoods. It's best to fruit them indoors (put them outside in the spring, summer or fall after they seem spent to possibly coax a few more harvests).

\*More detailed instructions are included with every spawn or kit purchase!
